

Your Water Plan on One Page

Worked example: Dana

Name Dana

Date _____

1

Daily use: people × your tier

The gallons per day your household lives on.

About 4 (4 people × 1, emergency tier) gallons per day

2

Storage: daily use × buffer days

How big your tanks need to be.

56 (for two weeks) gallons

3

Primary source: rain, well, spring, surface, or stored/hauled

From Chapter 3.

City water

4

Backup source: always two. Name it.

Must be a different source from line 3.

Stored reserve plus a rain barrel

5

Purification method

A one-line placeholder counts for now.

Boiling and bleach, plus a filter for cysts

6

Rough budget: a range

A range, not a to-the-penny quote.

from \$ 200 to \$ 500

Budget in ranges and round up.
